Figure 6. The effect of the number of iterations on the accuracy of the proposed algorithm. The figure shows two bar charts comparing the accuracy of the proposed algorithm against the number of iterations (10, 20, 30, 40, 50). The left chart shows the accuracy of the proposed algorithm compared to the baseline, while the right chart shows the accuracy of the proposed algorithm compared to the state-of-the-art methods. In both cases, the accuracy increases as the number of iterations increases, reaching a plateau around 40-50 iterations.
